

Measurement Worksheet

Measurement instructions:

Measure the window openings, not the window itself. Round up to the nearest inch. Indicate which window the measurement is for by labeling with numbers or letters. Measure the width first then the height. When complete, use measurements to determine which size panels and how many you need to order.

Window # _____

Shutter install: Horizontal or Vertical

Opening dimensions in inches: (round to nearest inch)

Width: _____

Height: _____

Window # _____

Shutter install: Horizontal or Vertical

Opening dimensions in inches: (round to nearest inch)
